Yagouba Barry

614-772-1305 | barry.418@osu.edu | linkedin.com/in/yagoubabarry | github.com/ybarry686

Education

The Ohio State University **Expected: May 2028**
B.S. in Information Systems, Minor in Computer Science, Minor in Film ***GPA: 3.83***
Relevant Coursework: Data Structures & Algorithms, Discrete Math, Databases, Networking, & Operating Systems

Technical Skills

Languages: Java, Python, Go, C#, SQL (Postgres, MySQL, SQLite), JavaScript, TypeScript, PHP, HTML/CSS
Dev Tools/Frameworks: AWS (EC2, Lambda, S3), Docker, React, Redis, Apache (Kafka, Spark), Flask, FastAPI, Git

Experience

Electronic Arts - Frostbite Game Engine May 2026 - Aug. 2026
Software Engineer Intern | Python, C#, SQL, AWS, Datadog, Splunk, GitLab *Remote*

- Reduced gameplay bug triage time by **96.7% (30 mins → sub-60 secs)** by deploying a multi-agent observability platform **(Python, SQL)** on **AWS** to auto-classify gameplay bugs, trace root causes, & assess bug severity
- Increased bug-ownership recommendation accuracy by **75%** by engineering a Perforce MCP **(Python, C#, SQL)** that churned through code commit data to map engineers' historical contributions into tailored developer profiles
- Slashed production/deployment failures **15%** by owning end-to-end observability, alerting thresholds, and **RAG** pipeline telemetry **(Datadog/Splunk)** to orchestrate distributed AI services; managed **CI/CD** in **GitLab**

SEO Tech Developer June 2026 - Aug. 2026
Software Engineer Intern | Python, TypeScript/JavaScript, SQL, Redis *Remote*

- Slashed application response times by **40% (A/B tested)** for **120+ concurrent users** by cutting JavaScript bundle size **20%** & leveraging async API calls/caching **(FastAPI, Redis)** across **3** full-stack web apps
- Improved **CI/CD** reliability **20%+** by engineering **50+ unit tests** across **6 containerized microservices**

Huntington National Bank Jan. 2026 – Apr. 2026
Machine Learning Engineer Intern | Python, SQL, XGBoost, Scikit-Learn, Pandas, NumPy *Remote*

- Achieved **55%+** directional accuracy in price forecasting by developing a multi-model forecasting suite **(XGBoost + Linear/Recursive Regression)**; accomplished a **70%** reduction in feature dimensionality space using **PCA**
- Cut API requests/retrieval latency **90%+** by building a parallelized, cached multisource ETL **(Pandas/NumPy)**

Electronic Arts - Skate. May 2025 – Aug. 2025
Software Engineer Intern | Python, SQL, Jira/JQL, Confluence, Slack API *Remote*

- Accelerated bug fixing for **40+** engineers and cut project managers weekly overhead **25%** by developing a multi-source ETL **(Python, SQL)** that transported **Jira** ticket data into **real-time** Slack alerts
- Cut API-related failures **35%** by engineering fault-tolerant API integrations with retries, validation, & fallbacks
- Slashed developer onboarding time by **30%** by refactoring studio-wide **(350+)** core documentation frameworks

Technical Projects

Berrie - ($5k in Monthly Recurring Revenue) | *Python, TypeScript, React, Redis, PostgresSQL/pgvector, AWS*

- Scaled the platform to **200 concurrent merchants in Week 1** by developing a Shopify-native app **(React/TypeScript)** that pulls real-time merchant store data to generate context-aware email campaigns
- Sustained **99.9%** real-time data accuracy while avoiding API rate limits across **200+ concurrent merchants** by pairing Shopify webhooks for lazy cache invalidation with an async event processing queue **(FastAPI + Redis)**

Real-Time Personalization & Recommendation Platform | *Python, PostgreSQL, Redis, Kafka, Spark, AWS, Docker*

- Built a distributed personalization platform processing **100K+** real-time user interaction events, dynamically serving recommendations using **multi-armed bandit algorithms (UCB1, Thompson Sampling, ε-greedy)**
- Sustained **200+ req/s throughput** at **p95 latency under 60ms** across **1M+** simulated user events by building a service-oriented backend **(FastAPI + PostgreSQL/pgvector)** with stateless workers & background jobs

Leadership & Personal Interests

SWE Fellowships - Management Leadership for Tomorrow, Sponsors for Educational Opportunity, ColorStack
Charity Fundraising - *Ran 1/2 Marathons for (Childhood Cancer, Completed!), (Breast Cancer Awareness, Pending...)*
